All you have to do from here is click 'Play' and the recording will begin. You will be able to pause, rewind and fast-forward the webcast. You will also be able to access the recording as many times as you would like.

On this screen, you will also be able to access the post test that needs to be completed to obtain CEU certificates, if applicable. Click 'Take Post Test Now' and follow the on-screen instructions to take the test and download your certificate(s). If no CEU's are available for the event, this will say 'Certificate of Attendance'. This can be submitted to the credentialing organization(s) of your choice for consideration for CEUs.

The second option after logging on is the handout for the webcast. Clicking either the title of the webcast or 'Open' will allow you to download the slides of the presentation for note taking or to refer back to later.
